

Spohn + Burkhardt

Elektrotechnische Fabrik Blaubeuren

Construction and mobile cranes

Control systems

**Individual control concepts -
We realize your solution**

TRADITION AND EXPERTISE

The company was founded in Blaubeuren by Karl Spohn and David Burkhardt in 1920 and is still 100 percent family-owned.

Today, with 200 employees, we manufacture a broad production program of joysticks, control stands and resistors of recognized quality at two locations.

With engineering knowledge and decades of experience, we solve your problems together with you and accompany you from start to finish. That is our strength and at the same time the basis of our success.

As a Swabian medium-sized company, our strength lies in the unbeatable advantage of being able to react quickly

and flexibly. When technology is moved around the world, Spohn + Burkhardt is usually the trigger.

FACTS AND FIGURES

- Founded in 1920 by Karl Spohn and David Burkhardt
- Headquarters Blaubeuren
- Plant Schelklingen
- About 65 representatives in 45 countries
- About 200 employees

Spohn+Burkhardt

Elektrotechnische Fabrik Blaubeuren

BENEFITS

- Made in Germany
- Optimal placement of the control devices
- Harmonious relationship between operator and equipment
- Relaxed and low fatigue work environment
- Upmost quality and service life
- Large dealer network providing service worldwide
- Smart, flexible designs allow for plug and play for most applications
- Custom designed solutions per customer requirements

FS-RHDG

Modular control station concept.

- Modular series made of metal
- Innovative side consoles in various designs and sizes
- Hinged console covers or removable insert plates
- Optionally with customer-specific layout
- Powder coating in standard or customized color
- Upper part of the seat can be moved individually or together with the side consoles
- Different console support systems for a variety of ergonomic adjustment options for fatigue-free and comfortable working
- Combinable with seats from various manufacturers
- Fixed or rotatable with eccentric brake or detent, motorized on request
- Different rotating footrests can be attached
- Adjustable armrests on the side consoles or on the seat
- Brackets for monitors, PCs, touch panels optional
- Available complete with installation and wiring as plug-and-play solution
- Developed in consideration of ergonomic requirements in accordance with DIN 33402

Manually rotatable

Motor-driven rotatable

Console length adjustment

Longitudinal seat adjustment

Console tilt adjustment

Console swiveling

Console longitudinal axis tiltable

Monitor attachment

Emergency release
